| United States | 109 | 1 | CDC Swine Flu website , WHO Disease Outbreak News 2009 Apr 30 |

- United States - additional details
 - first US death attributed to confirmed swine influenza reported in 23-month-old in Texas ([WHO Disease Outbreak News 2009 Apr 29](#), [CDC Swine Flu website](#), [CBCnews.ca 2009 Apr 29](#))
 - 109 confirmed cases with 1 death (as of 2009 Apr 30)
 - 50 in New York City, 26 in Texas, 14 in California, 10 in South Carolina, 2 in Kansas, 2 in Massachusetts, 1 in Arizona, 1 in Indiana, 1 in Michigan, 1 in Nevada, 1 in Ohio
 - Reference - [CDC Swine Flu website](#)
 - all mild cases with similar genetic pattern based on earlier report
 - all confirmed cases had mild influenza-like illness, only 1 required brief hospitalization
 - all 20 viruses have same genetic pattern on preliminary testing, being described as new subtype of influenza A (H1N1)
 - Reference - [WHO Disease Outbreak News 2009 Apr 26](#)
 - initial report of previously unidentified swine influenza A (H1N1) reported in 2 children in California in 2009 ([MMWR Morb Mortal Wkly Rep 2009 Apr 24;58\(15\):400 full-text](#))
- Mexico - additional details
 - suspect clinical cases have been reported in 19 of 32 states ([WHO Disease Outbreak News 2009 Apr 26](#))
 - 12 cases are genetically identical to swine influenza A (H1N1) viruses from California ([WHO Disease Outbreak News 2009 Apr 24](#))
 - 3 separate outbreaks of influenza-like illness reported (not all cases necessarily represent swine influenza activity)
 - Federal District of Mexico - 854 cases of pneumonia (and 59 deaths) from 2009 Mar 18 to 2009 Apr 23
 - San Luis Potosi (central Mexico) - 24 cases of influenza-like illness (and 3 deaths)
 - Mexicali (near United States border) - 4 cases of influenza-like illness (no deaths)
 - Reference - [WHO Disease Outbreak News 2009 Apr 24](#)
- Canada - additional details
 - 4 students in Nova Scotia (1 of whom had recent travel to Mexico)
 - 2 people in British Columbia with recent travel to Mexico
 - Reference - [CBCnew.ca 2009 Apr 27](#)
- 12 cases were reported to CDC in United States from 2005 Dec through 2009 Feb, prior estimate of about 1 human swine influenza infection every 1-2 years in United States⁽¹⁾
- 50 cases identified in literature review (search date 2006 Apr)⁽³⁾
 - 13 cases involved military personnel in outbreak at Fort Dix, New Jersey
 - geographic location of civilian cases
 - United States (19 cases)
 - Czechoslovakia (6 cases)
 - The Netherlands (4 cases)
 - Russia (3 cases)
 - Switzerland (3 cases)
 - Canada (1 case)
 - Hong Kong (1 case)
- 1 case in Spain in November 2008 ([Euro Surveill 2009 Feb 19;14\(7\)](#))
